

Intense Relief

Eye Drops

0.5ml

Singles - Sodium Hyaluronate 0.4%

Ocufresh Intense Relief Eye Drops - Singles is a sterile ophthalmic solution with a physiological pH, based upon a patented technology of cross-linking Hyaluronic Acid (HA) with Urea, therefore enhancing and improving the specific mechanical properties of native HA, resisting to hyaluronidase degradation much longer than native HA, thus with higher and prolonged lubricant and hydrating action than native HA.

The hydrating web structure of cross-linked HA is capable to deliver water for a prolonged period improving the lubricating properties of native HA while boosting its moisturizing effects at the same time, it is therefore indicated as an adjuvant in dry-eye syndrome.

The cross-linked HA provides to the product lubricating, moisturizing and repairing properties, capable of giving relief to ocular dryness due to dry eye syndrome, irritated or tired eye in case of inflammatory conditions or environmental factors.

The formula was developed to ensure maximum comfort already in the first moments after the application. It is suitable for everyday use, daily and night-time.

It does not contain preservatives and/or molecules with anti-inflammatory and vaso-constrictive actions.

Ocufresh Intense Relief Eye Drops - Singles is compatible with soft and rigid contact lenses.
